Introduction

This resource document is designed to provide information about technical assistance resources and educational materials that can guide the development, implementation, and evaluation of Human Immunodeficiency Virus (HIV) and other sexually transmitted infections (STI) prevention education programs for school-age youth. It also includes educational materials that can increase the awareness and compassion for the people in our communities infected and affected by Acquired Immune Deficiency Syndrome (AIDS) and HIV. The document is divided into two sections: a resource directory and an annotated resource list. As a whole, they provide the contacts and the foundation, respectively, for families, communities, and schools to fight the spread of HIV/AIDS and other STI.

The position of the federal Centers for Disease Control and Prevention (CDC) and the Wisconsin Department of Public Instruction (DPI) is that parents, communities, and schools must build local partnerships to address youth risk behaviors and to provide mutually reinforcing prevention and health promotion messages to children and youth. The most important message for young people about preventing STI and HIV is that refraining from sexual intercourse and alcohol and other drug use is the most effective prevention strategy. Wisconsin must strive to create a climate that supports young people who choose to abstain. Some young people, however, may be unwilling to abstain from sexual activity and/or alcohol and other drug use. Therefore, the annotated resources include entries that provide messages related to risk reduction. In addition, the DPI promotes an integrated approach to youth risk behavior prevention programming; therefore, the list includes resources on issues related to HIV/AIDS.

This publication was supported by CDC Cooperative Agreement #U87-CCU522659-01. Its contents are solely the responsibility of the authors and do not necessarily represent the official view of CDC. As a recipient of federal funding from CDC, DPI must abide by the Requirements for Contents of AIDS-Related Written Materials, Pictorials, Audiovisuals, Questionnaires, Survey Instruments and Educational Sessions in Centers for Disease Control Assistance Programs (revised June 15, 1992, 57 Federal Register 26742). The requirement states, among other things, that a program review panel of no less than five persons review and approve all applicable materials prior to their distribution and use in any activities supported by CDC assistance funds. You can obtain a copy of these guidelines from the CDC website at www.cdc.gov/od/pgo/forms/hiv.htm.

The program review panel members (see Appendix A) were selected from schools, agencies, and organizations that represent a cross-section of the general population and have expertise in HIV prevention and AIDS education. The panel has reviewed and approved all of the materials in the annotated resource list (see page xiii for review criteria). Inclusion of a program or resource does not imply endorsement by the DPI. The resources listed are for use in a variety of settings. Many of the materials have been approved for use with youth in high-risk circumstances and may not be appropriate for use in public schools. The annotations and the reader's discretion are critical in selecting materials that are developmentally and culturally appropriate for the intended audience. This document will continue to be updated biannually as new materials are made available and reviewed, and outdated resources are removed.

Resource Directory

The following national, state, and regional contacts are sources of current information and technical assistance to guide the development, implementation, and evaluation of HIV/STI prevention and AIDS education programs for school-age youth in Wisconsin.

National Contacts

AIDS Alliance for Children, Youth & Families

A national, non-profit organization dedicated to improving the lives of women, children, youth, and families living with HIV and to helping to stop the AIDS epidemic among young people, families, and communities through education and training, research, and advocacy.

(888) 917-AIDS or (202) 785-3564

***Cooperative Educational Service
Agencies (CESAs)***

Each of the 12 regional CESAs employs one or more consultants who provide assistance to schools in developing youth risk behavior prevention strategies. In addition, each of the CESAs has a media center that will rent or loan HIV/STI educational materials designed for children and youth. Educators should contact their local CESA to obtain a materials listing.

Internet Websites

The following national and state websites are sources of current information and technical assistance to guide the development, implementation, and evaluation of comprehensive HIV/STI prevention education programs for school-age youth. Some of these sites may contain prevention messages that may not be appropriate for all audiences. The views, opinions, and statements contained in these websites are not necessarily those of the DPI. The department is not responsible for the content of these websites, nor should links to other sites be inferred as an endorsement of those sites.

AIDS Education Global Information System
(AEGIS)

www.aegis.com

AEGIS is a comprehensive HIV knowledge base which includes AIDS Daily News Summaries, reprints of articles from select national and metropolitan newspapers, a database search engine linked to the National Library of Medicine, select conference summaries and conference calendars," how-to" papers written for persons newly diagnosed or living with HIV

infection, and comprehensive links to HIV-related sites.

Advocates for Youth

www.advocatesforyouth.org

Advocates for Youth is dedicated to creating programs and advocating for policies that help young people make informed and responsible decisions about their reproductive and sexual health. The organization provides information, training, and strategic assistance to youth service organization staff, policy-makers, youth activists, and the media.

CDC Division of Adolescent and School Health

www.cdc.gov/nccdphp/dash/index.htm

The Division of Adolescent and School Health (DASH) seeks to prevent the most serious health risk behaviors among children, adolescents, and young adults, including HIV/AIDS. This website contains information on surveillance activities, such as the Youth Risk Behavior Survey and School Health Education Profile, guidance on effective school health programs, and other important information on adolescent and school health.

CDC Division of HIV/AIDS Prevention

www.cdc.gov/hiv/dhap.htm

The National Center for HIV, STD and TB Prevention division is responsible for HIV/AIDS prevention. This site offers a range of basic information on topics ranging from prevention and vaccine research to funding opportunities.

CDC National Prevention Information Network

www.cdcnpin.org

NPIN provides information about HIV/AIDS, sexually transmitted infections (STI), and tuberculosis (TB) to people and organizations working in prevention, health care, research, and support services. All of NPIN's services are designed to facilitate the sharing of information about education, prevention, published materials, and research findings and news about HIV/AIDS-, STI-, and TB-related trends.

HIV InSite

<http://hivinsite.ucsf.edu/InSite>

The website includes medical information, prevention education materials, social policy information (including legislation), community and research resources, state-by-state information about HIV/AIDS, and more.

Henry J. Kaiser Family Foundation (HIV/AIDS Program)

www.kff.org/sections.cgi?section=hivaids

The Foundation's work in HIV/AIDS focuses on informing the national policy discussion about the HIV/AIDS epidemic within the context of a changing treatment environment and health-care delivery and financing system. Their work focuses on issues of health-care coverage, financing, access to care, and prevention, particularly for those increasingly impacted by the epidemic including women, people of color, and young people.

Know HIV/AIDS

www.knowhivaids.org

Viacom and the Henry J. Kaiser Family Foundation have created a media campaign to eradicate ignorance about HIV/AIDS. The multi-year initiative encompasses the creation and dissemination of information about HIV and its

prevention through television, radio, outdoor, on-line and print media. This website contains information on the media campaign, HIV/AIDS pandemic, HIV prevention and testing, national resources, and ideas on how to get involved in HIV/AIDS related efforts.

The Sexuality Information and Education Council of the U.S. (SIECUS)

www.siecus.org

SIECUS is a national nonprofit organization which affirms that sexuality is a natural and healthy part of living. Incorporated in 1964, SIECUS develops, collects, and disseminates information; promotes comprehensive education about sexuality; and advocates the right of individuals to make responsible sexual choices.

Wisconsin AIDS/HIV Program

www.dhfs.state.wi.us/aids-hiv/index.htm

The Wisconsin AIDS/HIV Program is the lead agency in Wisconsin government responsible for coordinating the state's public health response to the AIDS/HIV epidemic. This website contains information on surveillance and epidemiologic investigation, HIV counseling and testing services, HIV prevention education and risk reduction, life-care services, and early intervention.

Review Criteria for HIV/AIDS Instructional Resources

| <u>Criteria</u> | <u>Definition</u> | <u>Scale or Continuum</u> (1=criteria was not at all met 5=criteria was completely met) |
|-------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------|
| 1. Technical, accurate, and up-to-date | * Information on virus, transmission, and protection is complete and accurate to date of publication; information on where to access current data provided. | Automatic rejection if information is medically inaccurate, incomplete, or outdated. |
| 2. Gender-fair | * Equal and appropriate representation of males and females. Demonstrates equality in roles/authority, use of referent pronouns, addressing male and female risks of transmission, and responsibility for prevention/protection. | |
| 3. Developmentally appropriate for intended age and ability | * Language, concepts, and tone (emotional message) appropriate for age and audience. Addresses the needs of all learners, including those with physical, cognitive, or emotional disabilities. | |
| 4. Racially, ethnically, culturally non-biased | * Representation of communities of color and other diverse populations in actors and in materials that recognize and respect ranges in cultural/community norms, language, and beliefs. | |
| 5. Sound educational methodology for the recommended audiences | * Focus on the affirmation of personal responsibility and decision making. Skill-based, interactive and creative experience fostered. | |
| 6. Positive approach to human sexuality | * Presents human sexuality as positive. Builds on a basic appreciation of human sexual expression throughout the lifespan, including sexual orientation. | |
| 7. Educational messages/ strategies for the continuum of risk behaviors | * Abstinence from sexual intercourse and injectable drug use are promoted as the only 100% risk-free behaviors for the majority of HIV transmission. Additional risk reduction strategies are provided to meet the needs of all learners, including those who continue to engage in a range of high-risk behaviors. Does not directly promote or encourage sexual activity or drug use. | |
| 8. Resource quality | * The narration, packaging, sound, acting, and/or visual quality do not detract from the overall utility of the resource. | |

*Criteria set by the Program Review Panel, January, 1989.

Revised and approved by the panel April, 2001.

Annotated Resources

Curricula

The following are examples of educational materials to assist schools and communities in developing effective programs, policies, and practices related to HIV/AIDS education for school-aged youth.

In this section we have **shaded** those curricula that have been identified as promising prevention programs by the Urban Institute of Washington, D.C. Each was evaluated in at least one published scientific study. In addition, each of the selected programs meets the following criteria:

- ◆ The treatment group is matched with a comparison (no or minimal treatment) group.
- ◆ There is at least one follow-up review at three months after program conclusion.
- ◆ The initial sample size consists of 100 adolescents or more.
- ◆ The study retains at least half the participants at the final follow-up review.
- ◆ There is a statistically significant improvement for at least one target behavior in at least one target group.

In addition, these curricula have been identified by the National Campaign to Prevent Teen Pregnancy as “programs with strong evidence of success.”

AIDS Prevention for Adolescents in School. Los Altos, CA: PASHA, 1999.

This six-session program for grades 9-12 students has been developed to be implemented by classroom teachers. Combining principles of the health belief model with social psychology, the curriculum aims to improve students' knowledge, beliefs, self-efficacy, and risk behaviors concerning HIV/AIDS.

Audience: grade 9-12

Program Archive on Sexuality, Health & Adolescence (PASHA)
(650) 949-3282

Act Smart: HIV/AIDS Curriculum for Three Age Groups.

Boys and Girls Clubs of America and the American Red Cross, 1995.

Act Smart incorporates age-appropriate participatory learning activities. The program was developed based upon the rationale that HIV/AIDS prevention education is most effective when young people have the opportunity to develop functional knowledge about HIV/AIDS, consider choices that support healthy behavior related to HIV/AIDS, and identify and practice skills that support those choices. The *Act Smart* program emphasizes sexual abstinence, not using

drugs, and not sharing needles as the most effective ways to prevent HIV infection.

Audience: grade K-12

American Red Cross
(608) 233-9300 ext. 260

Alcohol and HIV: A Lethal Link?

Applied Health Research, 1996.

This collection of presentation materials demonstrates for parents the link between alcohol and HIV infection. Included are presentation summaries paired with citations, transparency overhead masters, and slides.

Audience: parents

Applied Health Research
(402) 474-0930

The Art of Loving Well: A Character Education Curriculum for Today's Teenagers.

Boston University, School of Education, The Loving Well Project, 1993.

Designed to supplement an English curriculum, this book is an anthology of 41 readings from the classics and contemporary adolescent literature. The Loving Well character education project is predicated on the belief that young people will learn how to achieve fulfilling relationships by promoting conversation and reflection about common human experiences. The book is

divided into three sections, including Early Loves and Losses, Romance, and Commitment and Marriage. The selections are borrowed from a wide range of writers, including the Brothers Grimm, John Updike, William Shakespeare, Alice Walker, and others, and selections focus on the institution of marriage.

Audience: grade 9-12

Friends First

(800) 909-WAIT

Becoming a Responsible Teen (B.A.R.T.).

ETR Associates. 1998.

BART is an HIV/AIDS prevention curriculum designed to be used in a nonschool setting with African American adolescents ages 14-18. The eight-session curriculum is presented in the form of a guide for leaders, with participant handouts that can be duplicated and distributed. Through a variety of training methods, participants learn: essential information about HIV/AIDS; ways to handle social and sexual pressures; ways to communicate assertively with friends and potential sexual partners; refusal negotiation and condom-use skills; and how to carry this message into their communities.

Audience: grade 9-12

ETR Associates

(800) 321-4407

Celebrate Immunization: Grades 6-12.

University of Florida, Center for Cooperative Learning, 1995.

Celebrate Immunization combines team-based learning materials, videos, and home/school learning activities to offer a comprehensive learning experience to middle and high school students. Students learn the scientific method and the importance of immunization. The curriculum is flexible and can be taught in one or two to six class periods. Students will learn about AIDS, influenza, tetanus, and polio. A home/school connection tool is provided in English and Spanish to inform and involve families and students in home discussions and activities. **Audience: grade 6-12**

University of Florida

(904) 392-3858

Circle of Life HIV/AIDS Curriculum, The.

ORBIS Associates, 1998.

The Circle of Life HIV/AIDS Curriculum was designed to provide an American Indian/Alaska Native cultural context to HIV/AIDS education. This is a culture-based curriculum focused on health education, not sex education. Consistent

with American Indian cultural values, the module for each grade level incorporates concepts associated with family and community. The underlying principle of the material is to help students develop the skills, values and behaviors that they will need to avoid or reduce the risk of HIV infection later in life. Purchase of the curricula is contingent upon teachers being trained by an authorized Circle of Life Trainer. For further information on this training, please contact: Edwin Schupman, Bureau of Indian Affairs, Office of Indian Education Programs.

Audience: grade K-6

Edwin Schupman

(509) 448-7236

Draw the Line/Respect the Line: Setting Limits to Prevention HIV, STD and Pregnancy, Santa Cruz, CA: ETR Associates, 2003.

This curriculum promotes abstinence by helping students develop personal sexual limits and practice the skills needed to maintain those limits when challenged. Healthy sexual limits will keep youth safer from HIV, other STI and unplanned pregnancy. This 19-lesson curriculum is designed to be used either by a classroom teacher or trained family life educator in the sixth, seventh and eighth grades. In grade 6, the emphasis is on situations in which youth may be pressured to steal, use alcohol or smoke. In grade 7, pressures regarding sexual intercourse are considered. In grade 8, the lessons feature an HIV-positive speaker, practicing refusal skills in dating contexts, and a condom demonstration.

Audience: grade 6, 7 and 8

ETR Associates

(800) 321-4407

Everybody: Preventing HIV and Other Sexually Transmitted Diseases Among Young Teens. Carbondale, CO: RAD Educational Programs, 2001 (rev.).

Everybody contains 24 sequential student-centered activities with guiding questions, step-by-step directions, assessment measures and lesson extensions. This curriculum is medically accurate and focuses on promoting healthy behaviors through risk elimination (abstinence) and risk reduction strategies. This is a flexible yet structured prevention model intended for local adaptation.

Audience: grade 5-9

RAD Educational Programs

(970) 963-1727

Focus on Kids: Adolescent HIV Risk Prevention.*

Santa Cruz, CA: ETR Associates, 1998.

This community-based, eight-session HIV/STI prevention program has proven effective in giving urban youth the skills and knowledge they need to protect themselves from HIV and other STIs. *Focus on Kids* includes a variety of interactive activities: games, role-plays, discussions, and community projects; makes use of naturally occurring peer groups; covers condom use, abstinence, sex and drug pressures faced by youth; offers practice in communication and decision-making skills; and helps develop negotiating skills and clarify personal values (recommended for use with the video *What Kids Want to Know About Sex and Growing Up* (see the **Audiovisual** section).

Audience: grade 6-12

ETR Associates

(800) 321-4407 or (800) 435-8433

Get Real About AIDS.

Comprehensive Health Education Foundation, 1993.

Curricular materials provide accurate information about abstinence, STIs (including HIV/AIDS), and risk reduction. Included are activities to strengthen social skills and to motivate youth to use the information and skills they learn.

Curriculum updates are available at www.chef.org/prevention/aids.php

Audience: grade 3-12

Know HIV/STD Prevention Curriculum.

Washington Department of Public Instruction, 1995.

This curriculum is separated into the following grade ranges: 5-6, 7-8, 9-10, 11-12. The *Know: HIV/STD Prevention Curriculum* goes beyond increasing student knowledge and aims toward impacting health behaviors by affecting attitudes and beliefs as well as building health-promoting life skills. In addition to the curriculum itself, sections are included on teacher preparation, community and parent involvement, letters to parents, and curriculum selection committees.

Audience: grade 5-12

Making a Difference: An abstinence-based approach to HIV/STD and teen pregnancy prevention.

Jemmott, Loretta Sweet, Ph.D., R.N., F.A.A.N.; John B. Jemmott III, Ph.D.; Konstance A. McCaffree, Ph.D.,
2002

Making a Difference is an eight-hour module curriculum designed to empower adolescents to change their behavior in ways that will reduce their risk of becoming infected with HIV, other STIs, and becoming (or getting someone) pregnant. Specifically, this curriculum advocates postponing sexual activities and emphasizes that abstinence is the only way to completely eliminate their risk for STIs, HIV, and pregnancy. This curriculum was designed to be used with small groups (6-12 participants) but can be implemented with larger groups. It is appropriate for various community settings, including schools and youth agencies.

Audience: grade 6-8

Select Media, Inc.

(845) 774-7335

Making Proud Choices: A safe-sex approach to HIV/STDs and teen pregnancy prevention. New York, NY: Select Media, Inc. Video and Activity Kit. 2002.

Making Proud Choices! is a research-based curriculum that will allow youth to feel comfortable abstaining from sex completely or using condoms if they choose to be sexually active. *Making Proud Choices* is an adaptation and extension of the original *Be Proud! Be Responsible!* curriculum. Four major components make up the curriculum and they include, 1) goals and dreams and their relationship to adolescent sexual behavior, 2) knowledge of HIV/STIs transmission and prevention and unintended pregnancy, 3) beliefs and attitudes about condoms, HIV/STIs and

* This curriculum has not been identified by the National Campaign to Prevent Teen Pregnancy as an evidence-based program.

pregnancy, and 4) skills and self-efficacy including negotiation-refusal and condom use skills.

Audience: grade 6-8

Our Whole Lives: Lifespan Sexuality Education Curricula. Boston, MA: Unitarian Universalist Association. 1999.

Our Whole Lives: Sexuality Education for Grades K-1.

Our Whole Lives: Sexuality Education for Grades 4-6.

Our Whole Lives: Sexuality Education for Grades 7-9.

The Parent Guide to Our Whole Lives, Grades K-1, 4-6. 2000.

Our Whole Lives is a series of sexuality education curricula for five age groups that span kindergarten through adulthood. The program equips participants with accurate, age-appropriate information in six subject areas: human development, relationships, personal skills, sexual behavior, sexual health, and society and culture. Grounded in a holistic view of sexuality, OWL provides not only facts about anatomy and human development, but helps participants to clarify their values, build interpersonal skills, and understand the spiritual, emotional, and social aspects of sexuality.

Note: The K-12 curriculum has not been reviewed at this time.

Audience: grades K-1, 4-6, 7-9, Parents

(617) 742-2100

"Personal and Social Skills: Understanding and Integrating Competencies Across Health Content." ETR Associates. Santa Cruz, CA. 1992.

The goal of this curriculum guide is to provide an understanding of four personal and social skills, which are decision making, communication, stress management, and goal setting and provide ideas on how these life skills can be integrated across all health content areas.

Audience: grade 6-12

ETR Associates

(800) 321-4407

Postponing Sexual Involvement: An educational series for young teens. Atlanta, GA: Adolescent Reproductive Health Center, 1998.

The series was developed to help young people resist pressures to become sexually involved before they are ready. The aim of this series is to present information regarding the general nature of relationships and sources of societal pressure influencing sexual behavior. Young teens are also given skills that enable them to say no in situations where they are asked to do something they do not wish to do.

Audience: grade 7-9

Adolescent Reproductive Health Center

(414) 616-3513

Project SNAPP. Santa Cruz, CA: ETR Associates, 1996.

Project SNAPP curriculum is organized into eight sessions. It utilizes a variety of interactive methods to provide students with information about HIV and pregnancy; allows students to practice communication, refusal and negotiation skills; and helps students identify and access community resources.

Audience: grade 6-8

ETR Associates

(800) 321-4407

Reducing the Risk: Building Skills to Prevent Pregnancy, STD and HIV.

Santa Cruz, CA: ETR Associates, 1996 (rev.).

The major focus of this curriculum is to assist educators in creating opportunities for students to practice the communication skills needed to eliminate or reduce the risk of pregnancy, STI, and HIV infection. *Reducing the Risk* was developed with the specific intent of preventing risky adolescent sexual and drug behaviors, including sexual intercourse without condoms.

Audience: grade 6-12

ETR Associates

(800) 321-4407

Removing the Risk: Abstinence for High School Students.

Santa Cruz, CA: ETR Associates, 1997.

This curriculum presents abstinence as a positive, viable choice for adolescents. Lessons are student-centered and interactive and are designed to help students postpone sexual involvement,

build healthy relationships which do not include sexual intercourse, and avoid high-risk sexual behaviors.

Audience: grade 6-8

ETR Associates
(800) 321-4407

Safer Choice: Preventing HIV, Other STD and Pregnancy. Santa Cruz, CA: ETR Associates, 1998.

The *Safer Choices* program uses a multiple-component approach that focuses on school-wide change and the influence of the total school environment on student behavior. *Safer Choices* includes: two 10-lesson curricula (taught in consecutive years, with two workbooks), Peer Leader Training Guide (to train Peer Leaders to help with the lessons, with 2 workbooks), and an Implementation Manual (outlines the complete program, sample forms, and procedures).

Audience: grade 9-12

ETR Associates
(800) 321-4407

Sex Can Wait. Santa Cruz, CA: ETR Associates, 1994.

All three programs build students' factual understanding and refusal skills, before they become involved in sexual relationships. They contain teaching goals and objectives, lesson overviews, background information, detailed teaching scripts, take-home parent materials, and transparency masters. *Sex Can Wait* does not cover birth control. It gives a single message to students, and allows them to focus on abstinence as the best and safest choice.

Audience: grade 4-5, 6-8 and 9-12

(800) 321-4407

Sex, Teens, AIDS: Take 'Em Serious (S.T.A.T.S). March of Dimes, curriculum/activities guide and video (20 min), 2000.

This video, video guide and curriculum (better used as an activities guide) were originally developed for a male responsibility program of Alpha Phi Alpha Fraternity, Inc., but it has recently been adapted for use with both male and female audiences. The video, fast-paced and music-oriented, gives youth information they can use. Each teen's decision, whether to delay intercourse or to be abstinent, is respected and valued. The materials address safe sex and contraceptive issues for young people who choose

to have sex. Other issues that are explored include peer pressure, successful intimate relationships, abstinence, and goals and self-esteem.

Audience: grade 7-10

March of Dimes
(800) 367-6630

Teaching Kids About...How AIDS Works.

Santa Cruz, CA: ETR Associates, 1996.

This curriculum contains two grade-appropriate books with suggestions for presenting the units at different learning levels. Both books provide written content summaries for each unit, student handouts, worksheets, and family-activity homework assignments. There is general background information about HIV/AIDS, selected references and resources to help teach this topic, and sections on how to discuss sensitive topics with children.

Audience: grade K-5

ETR Associates

Teenage Health Teaching Modules: Growing Into Healthy Sexuality. Sewickley, PA: Education Development Center, Inc. 1998.

Growing into Health Sexuality represents a starting point for developing a comprehensive approach to sexuality education within the context of comprehensive school health education. Each module supports the other modules and provides students with information and opportunities to develop positive attitudes and acquire skills for healthy life. This approach provides adolescents with opportunities to develop a positive view of sexuality, to acquire the information they need to take care of their sexual health, to respect and value themselves and

others, and to learn skills to make healthy decisions.

Audience: grade 6-8

Education Development Center, Inc.
(800) 793-5076

Wise Guys: Male Responsibility Curriculum.
Greensboro, NC: Family Life Council of Greater Greensboro, Inc., curriculum/activities guide, 2001 ed.

Wise Guys is a program designed to prevent adolescent pregnancy by teaching young men between the ages of 10 and 15 self-responsibility, especially in the area of sexual development. Activities range from personal and family values to abstinence and contraception. Although developed as a curriculum, *Wise Guys* is constructed in a way (such as non-sequential lessons) that it would be best applied as an activities guide to supplement a human growth and development curriculum.

Audience: grade 6-9

Family Life Council of Greater Greensboro, Inc.
(336) 333-6890

Audiovisuals

The following are examples of educational materials to assist schools and communities in developing effective programs, policies, and practices related to HIV/AIDS education for school-aged youth.

A Is for AIDS (rev.).

Altschul Group Corporation, 1992. 15 min. video.

Through the use of animation, this video demonstrates how the immune system functions and how it is drastically altered when a person's body is infected with HIV. The video also contains footage of Magic Johnson's press conference in which he revealed he is HIV positive and stressed why it is important to learn the facts.

Audience: grade 3-5

Altschul Group Corporation
(800) 323-5448

AIDS, Not Us.

Family Health Productions, 1991. 36 min. video.

This video dramatizes the lives of five inner city youths. In this realistic drama, each "posse" member deals with conflict, confronts his risk for AIDS, and makes difficult personal choices.

AIDS, Not Us is a behavior-oriented intervention video that targets urban minority youth and

focuses on sexual risk behaviors and the barriers to condom use.

Audience: grade 9-12

Family Health Productions
(800) 343-5540

Abstinence...It's the right choice.

SVE & Churchill Media, 1995. 22 min. video.

This video shows a discussion among teens and serves as a focus for discussion about sexual decision-making and postponing sexual activity.

Audience: grade 6-12

Society for Visual Education (SVE)
(800) 829-1900

Blood Lines: A View Into the Souls of HIV+ Youth.

Santa Cruz, CA: ETR Associates, 1998. 22 min. video.

This is a film directed and produced by HIV-positive youth who contracted HIV as teenagers. They traveled across Europe and the United States interviewing HIV-positive youth like themselves to create a documentary that voices their confusion, grief, and hope. The film empowers those who live with HIV/AIDS, inspires compassion for people living with the virus, and motivates others to avoid getting infected.

Audience: grade 9-12+

ETR Associates
(800) 321-4407

Camp Itsamongus.

Knox County Chapter, American Red Cross, 1990. 15 min. video and teacher guide.

This video focuses on the relationship between two children (puppets) at summer camp. In a very humorous way, the campers clarify misconceptions about HIV transmission and overcome the fear of living with an HIV positive camper. A teachers' guide is included.

Audience: grade K-5

American Red Cross-Greater Milwaukee Chapter
(414) 342-8680

A Challenge To Us All.

Elizabeth Glaser Pediatric AIDS Foundation, 1993. 22 min. video and guidebook.

This package contains two videos, *A Parent Meeting* and *Educating Our Children*, and a guidebook designed to provide information to parents about ways to provide HIV education to children. The videos also assist in clarifying issues related to a child or staff person with AIDS/HIV infection in the school setting.

Audience: parents

Elizabeth Glaser Pediatric AIDS Foundation
(310) 395-9051

Children Talk About AIDS.

Teachers College Press, 1999. 23 min. video.

The *Children Talk About AIDS* video is designed to be used in professional development settings and to help novice and experienced educators understand the knowledge, concerns, and questions for young children about this disease. This video does not offer a specific formula for teaching; rather, it depicts the use of open-ended classroom discussion to explore this difficult subject with young students.

Audience: school staff (grade K-5)

Teachers College Press
(800) 575-6566

Come Sit By Me: AIDS Education. Channing Bete Company, 1991. 8 min. video

Illustrations accompanied by a child's soft narration combine to tell this touching story about friendship and human compassion while teaching young children about AIDS. The program introduces key points about the disease, reassures viewers about the risks they face, and promotes understanding and compassion toward those who are HIV positive.

Audience: grades K-3

Channing L. Bete Co., Inc.
(800) 628-7733

Considering Your Options: Information on abstinence and contraceptive choices for teenagers.

National Education Association, Health Education Network, 1998. 23 min. video & guidebook.

This fast-paced video combines animated segments where "Alex" goes on-line to learn more about his contraceptive options with real teens discussing their choices and concerns about sexual activity and various birth control methods. The video covers the following methods of contraception: abstinence, condoms, birth control pills, Depo-Provera and Norplant, big myths, and emergency contraception.

Audience: grade 9-12

NEA Professional Library
(800) 229-4200

Frontline: The Lost Children of Rockdale County PBS, 1999, 90 min. video.

The *Lost Children of Rockdale County* video deals with a controversial but important subject matter: affluent suburban teens struggling not only with a rare syphilis outbreak, but also loneliness, disaffection, sexual promiscuity, and substance abuse. Although *Lost Children* begins with an inquiry into how and why the syphilis outbreak happened, the documentary

becomes in the end a wider, deeper examination of the world of teenagers and their relationships with their parents and each other.

Audience: grade 9-12+, parents

PBS Video
(800) 328-7271

HIV and AIDS: Staying Safe. 2001, 15 min. video and activity guide

This program helps kids understand why prevention is so important when it comes to HIV. It introduces adolescents to some basic facts about HIV/AIDS. Through discussion, demonstration, and animation, the kids will see what the virus does inside the body and why it leaves the body so vulnerable to other infections, and how HIV develops into AIDS. The program explores the ways that HIV can and cannot be contracted, so that kids can identify safe and risky behaviors.

Audience: grade 4-6

The Health Connection
(800) 548-8700

I Need a Friend: Kids Talk About the AIDS Virus.

Molly Matthews, 1992. 15 min. video.

Children who have AIDS/HIV infection talk about how their disease has affected their friendships and their experiences in school.

Audience: grade 3-12

Matthews Media Group
(301) 816-9355

In Our Own Words: Teens and AIDS.

Santa Cruz, CA: ETR Associates, 1995, 20 min. video.

In Our Own Words profiles five young people infected with HIV as teens through unprotected sexual intercourse. They address denial, living with HIV, alcohol and its potential link to risky behavior, postponing sexual activity, condom use and the importance of making healthy decisions. Package includes video and Educator's Discussion Guide to facilitate pre- and post-screening discussion.

Audience: grade 6-12 (available in Spanish)

ETR Associates
(800) 321-4407

Just Thought You Ought To Know.

The Medical Institute, 1998. 7 min. video.

This video is a short, intense production featuring teens talking to teens in their own language about the risks of sexual contact—even when using a condom. It is meant to be a springboard for

opening lines of communication between teens and adults about the importance of sexual abstinence.

Audience: grade 6-12

Medical Institute for Sexual Health
(800) 892-9484

Laughing and Learning About HIV/AIDS: Reaching Teens with Honesty and Humor.

CenterOne, 1998. 58 min. video.

This video not only tells the basics about HIV/AIDS, but it tells the stories behind the headlines, separating facts from fears. With on-screen footnotes documenting each point made, *Laughing and Learning* explains HIV transmission, testing, and treatment.

Audience: grade 9-12

CenterOne, Inc.
(954) 537-4111, ext. 141 (voice mail)

Little Questions, Big Questions.

New Jersey Network, 1993. 25 min. video.

This video is designed to help school boards, parents, administrators, teachers, and other concerned adults understand the benefits of beginning family life education in the early grades. Early childhood is the critical time to lay a foundation for healthy sexuality which can help to prevent problems later in life.

Audience: school staff (grade K-5); parents

Rutgers, The State University of New Jersey
(732) 445-7929

Little Secret.

Tell the Truth Pictures, 37 min. video.

In *Little Secret*, we meet a group of ethnically diverse teenagers who are total strangers, but they have one thing in common. They are all HIV positive. Join them as they meet for the adventure of a lifetime, whitewater rafting through the Sawtooth Wilderness Area of Idaho. The creators of this video hope that by putting real faces to the disease, they can create compassion and understanding for those who are HIV-positive.

Not One More Person: Avoiding HIV.

New Dimension Media, 1998. 25 min. video.

This program presents young people who became HIV positive through unprotected heterosexual sex. Honest discussion informs viewers about how AIDS is transmitted, how you can protect yourself, and what it's like to live day-to-day with HIV/AIDS.

Audience: grade 6-12

New Dimension Media
(800) 288-4456

Party, The.

American Red Cross, 1996. 13 min. video and discussion guide.

The Party video is designed to be used as part of an HIV prevention education program or curriculum for youth ages 13-15. The video is intended to act as a trigger for discussion and activities related to decision making. The video does not have an ending, but rather leaves viewers to think for themselves about the decisions the characters will make. Because it touches only briefly on the facts about HIV and AIDS, the video is meant to be used with youth who already have basic knowledge about HIV and AIDS. The accompanying user's guide and two-sided poster provide the materials necessary to facilitate interactive activities with young people.

Audience: grade 8-9

American Red Cross
(800) 667-2968

Porch Light.

South Dakota Department of Education and Cultural Affairs, 1999. 28 min. video and discussion guide.

This video realistically portrays the complex issues and emotions facing people with AIDS and their families, especially in rural settings, and fosters a compassionate response toward people facing such complex issues. The accompanying discussion guide reinforces the aforementioned and also encourages viewers to consider ways in

which their school, church, or community can provide support to people living with HIV and AIDS and their families.

Preparing Schools for Children with HIV.

Learner Managed Designs, 1995. 50 min. video.

This video is designed to help prepare school staff for students who are HIV+. The total package includes a videotape, manual, and test packet. There are five parts: Understanding HIV, Dealing with Body Fluids, Maintaining Confidentiality, Guidelines to Keep Children Healthy, and Education About HIV.

Audience: school staff

Learner Managed Designs, Inc.
(785) 842-9088

Preventing Sexually Transmitted Infections.

Human Relations Media, 1998. 25 min. video and CD-ROM.

This video and accompanying CD-ROM provide students with all the facts, with emphasis on prevention. In the format of a radio call-in show, information is provided on a wide variety of sexually transmitted infections (STIs). Students learn the prevalence of these infections in the population, the symptoms, the treatment, the long-term effects, and how to prevent them.

Audience: grade 9-12

Human Relations Media (HRM)
(800) 431-2050

Raising Healthy Kids: Families Talk About Sexual Health.

Media Works, 1997. Two 30 min. videos and discussion guides

This video series and the accompanying discussion guides can serve as a catalyst for group discussions about sexuality in a variety of settings (for example, homes, faiths, communities). The parents in *Raising Healthy Kids* provide an excellent example of the power of group discussion and will stimulate discussion among viewers. One of the videos and discussion

guides is for parents of young children, and the other is for parents of preadolescents and adolescents.

Audience: parents

Media Works, Inc.
(978) 282-9970

Real People: Teens Who Choose Abstinence.

Sunburst, 1993. 24 min. video.

Teens who are committed to abstinence discuss the personal, social, and ethical reasons they choose abstinence and how they view this choice as a desirable alternative. Some of the consequences of active sexual behavior—disappointing relationships; emotional upset; risk of AIDS, STIs, pregnancy—are highlighted.

Note: Video is several years old, but the issues covered are still current and relevant to today's youth.

Audience: grade 6-12

Sunburst Communications
(800) 431-1934

STD's: Straight Talk. AGC Educational Media, 1993. 20 min. video.

This revised program covers both the emotional and physical results of sexually transmitted diseases. The program follows two teenagers, one male and one female, as they visit their local health clinic and undergo STI testing. The exam is thoroughly explained, and symptoms are illustrated. It stressed that although most sexually transmitted diseases are preventable, not all are curable. The only way to be safe is by practicing abstinence.

Audience: grade 9-12

AGC Educational Media
(847) 328-6700 or (800) 323-9084

Sex and Other Matters of Life and Death.

Public Policy Productions, 1997. 29 min. video.

This documentary is a profile of STAR Theatre, a teenage theater company, that uses drama and peer education to help teens avoid pregnancy and disease. Recognized by the American Medical Association as one of the nation's most innovative AIDS education programs, STAR Theatre uses a frank peer-to-peer approach to reach adolescents at risk. Includes multi-racial characters.

Audience: grade 6-8

AGC Educational Media
(847) 328-6700 or (800) 323-9084

Subject Is: HIV, The.

Family Health Productions, 1992. 16 min. video.

The film portrays the vital basics of HIV/AIDS. Host Rae Dawn Chong explains HIV and AIDS and how these viruses can and cannot be transmitted; promotes understanding for people who are HIV-positive or who have AIDS; and offers teenagers strategies and support for negotiating abstinence as a primary means of AIDS prevention.

Audience: grade 9-12

Family Health Productions
(800) 343-5540

Tattooing and Body Piercing: Thinking smart about body art.

SVE & Churchill Media, 2001. 22 min. video.

Don't let students make uninformed decisions about body art: give them the facts they need to ensure safety and future contentment. Stressing the importance of forethought, this objective program identifies every issue to consider before getting a piercing or tattoo. Viewers will encounter competing opinions about body art as interview subjects express both joy and regret about their piercing. Along the way, a dermatologist explains both procedures, reveals the dangers of body art, illustrates easy ways to stay safe, and details the difficulty and costliness of tattoo removal.

Audience: grade 9-12

SVE & Churchill Media
(800) 829-1900

Teen Contraception.

Film Ideas, 1996. 13 min. video. Also available in Spanish.

Although this video stresses abstinence as the most desirable means to prevent pregnancy and the transmission of STIs, for many teens who have chosen to become sexually active, there is a need for factual information on the possible consequences of their behavior. In a non-judgmental and comfortable fashion, the two teen hosts assist viewers in learning about myths, risks, and realities of having sex. They discuss and examine the common forms of preventative contraceptives by rating their effectiveness and clarifying their proper method of use. Note: Video is several years old and may not cover all current birth control options.

Audience: grade 7-12

Film Ideas, Inc.
(Call for special school pricing.)
(800) 475-3456

The Teen Files: The Truth About Sex.

AIMS Multimedia, 2000. 45 min. video.

Hosted by Leeza Gibbons, this video forces teenagers to face the hard-hitting realities of having sex too young, including unwanted pregnancies and STIs. Viewers are introduced to sexually active teenagers, many of whom are having unprotected sex. They witness firsthand the struggles of becoming teen parents and living with full-blown AIDS. A group of teenagers go through a "mock AIDS test" and discuss with Dr. Drew their attitudes and feelings about sex.

Audience: grade 6-12

AIMS Multimedia
(800) 367-2467

Teen Issues—Living With HIV. Video. AGC Educational Media. 1996. 17 min.

This program profiles Rick Harrington, a teenage boy who was born with HIV. Rick clearly explains for teens what HIV is, how it is and is not transmitted, and what life is like for him.

Audience: grade 6-8

AGC Educational Media
(800) 323-9084

Teens Talk: How to Protect Yourself in the Age of AIDS.

COMMET, 1999. 21 min. video.

This video covers testimonials from real teenagers about their views on sexual relationships and AIDS. Single teens, couples, and several HIV positive patients are interviewed. The package includes a study guide for students and teachers.

Audience: grade 9-12

COMMET
(310) 440-0767

Update: Sexually Transmitted Diseases.

Sunburst Communications, 1995. 30 min. video.

Revolving around true-to-life stories of a number of teens who find themselves facing the harsh reality of having an STI, the program identifies and provides facts about the most common STIs. The three that are the fastest-growing among adolescents are discussed in depth: chlamydia, human papilloma virus (HPV) or genital warts, and genital herpes. Other STIs are also mentioned. The video also counters myths about HIV and AIDS.

Audience: grade 9-12

Sunburst Communications
(800) 431-1934

We Owe it to Ourselves and Our Children.
The National Native American AIDS Prevention Center, 7 min. video.

We Owe it to Ourselves and Our Children discusses HIV and other STIs in a frank and open manner and uses pictures and terminology that are sensitive to American Indian traditions and culture. The video covers basic facts about STIs, their symptoms, treatment and prevention, including a condom demonstration.

Audience: grade 9-12, adult

The National Native American AIDS Prevention Center

What Kids Want to Know About Sex and Growing Up.
Children's Television Workgroup, 1992. 60 min. video.

In straightforward discussions, sex educators Bob Selverstone and Rhonda Wise offer reassuring answers to kid's questions and correct potentially dangerous misinformation. Topics include: the physical and emotional aspects of puberty, sexual intercourse, AIDS, conception, masturbation, peer pressure, parenting, and more. It is recommended for use with the *Focus on Kids: Adolescents HIV Risk Prevention* curriculum (see Curricula).

Audience: grade 6-8

ETR Associates

(800) 398-2504

Be a Friend: Children Who Live with HIV Speak. Wiener, Lori S., Aprille Best, and Philip A. Pizzo. Morton Grove, IL: Albert Whitman, 1994.

Be a Friend is a collection of art and writings by children with AIDS or HIV infection who have come to the National Cancer Institute for treatment. It is divided into three sections. In "I Often Wonder..." children express what they wonder about and wish for. In "Living with HIV," these children speak of their desire to be "normal" and share their fears of separation from friends and loved ones. And in "Family, Friends, and AIDS," they speak of missing parents and friends who have died of AIDS and their siblings' worry about their brothers' and sisters' illness.

Guides and Resource Books

The following are examples of educational materials to assist schools and communities in developing effective programs, policies, and practices related to HIV/AIDS education for school-aged youth.

Abstinence: Pick and Choose Activities. Young, Michael and Tamera Young. Santa Cruz, CA: ETR Associates, 1996.

Abstinence: Pick and Choose is designed to provide teachers with classroom activities they can use to promote sexual abstinence as a viable option for adolescents. The book is organized into 4 sections. Activities focus on the areas of self-esteem, interpersonal relationships, decision-making skills and life planning-areas with a strong relationship to adolescent sexual behavior. The Teacher Information at the beginning of each section provides relevant background and content knowledge for the topic.

Audience: grade 7-12

ETR Associates
